## ANDROMEDA MEDIZINISCHE SYSTEME GMBH

Wallbergstraße 5, 82024 Taufkirchen, Germany  
T : +49 89 614156-0  
F : +49 89 614156-11  
W : www.andromeda-ms.de  
E : info@andromeda-ms.de  
Booth nr. : I07

Andromeda is a German based medical service company which develops and produces urodynamic measurement systems and disposables. We are market leader for urodynamics in German speaking countries and market these products in 50 countries around the world. We offer urodynamic equipment from our computerized Conus PC Flowmeter up to complete solutions for video urodynamics with our Ellipse system. The new Ellipse colour offers wireless communication with a coloured screen. With our Ellipse Chair we set a new benchmark for integrated urodynamic measurement systems. The concept behind this fully integrated system: all analysis functions are permanently installed in the urogynaecological chair, including the flow system, catheter puller and pressure transducers. The Helix can manage the entire spectrum of urodynamic measurements combined with simple, quick and effective operation. Clinicians can now delegate most of the work involved in preparing the urodynamic procedure.

## ANGIODYNAMICS

Booth nr. : G06

Combat Medical is a specialist thermotherapy medical device company. We have developed the COMBAT BRS system, an innovative and patented recirculation system for the delivery of Hyperthermic Intra-Vesical Chemotherapy (HIVEC) in the treatment of non muscle invasive bladder cancer (NMIBC). In clinical use since 2011 the COMBAT BRS system maximises the efficacy of the chemotherapy treatment, is a safe and effective technology. It harnesses the proven synergistic effects of chemo-hyperthermia to target NMIBC whilst remaining simple to integrate into current practice. It requires minimal additional resources for the healthcare provider whilst maximising outcomes for patients with this type of bladder cancer. Chemo-hyperthermia has recently been recommended in UK and Spanish guidelines for treatment options in the fight against bladder cancer.

F : +49 761 151474-19  
W : www.concile.de  
E : info@concile.de  
Booth nr. : A34

UBC® Rapid is a rapid test for primary diagnosis and follow-up of bladder cancer patients. The POC test is manufactured by IDL Biotech AB, Sweden and can be used for qualitative and quantitative measurement in urine. In combination with the POC-reader concile® Ω100 it also facilitates risk prediction compared to conventional non-quantitative dichotomized POC-testing. The reader is being manufactured by concile GmbH from Germany. In addition, concile develops and distributes POC tests for quantitative measurements of PSA, fPSA, Testosterone, LH, FSH and other analytes.

IDL Biotech AB, develops, produces and internationally markets In Vitro Diagnostic (IVD) tests. Within the area of urologic oncology, IDL Biotech AB offers tumor activity markers for detection, prognosis and monitoring of urinary bladder (UBC® ELISA, UBC® IRMA and UBC® Rapid) and prostate cancer (TPS®). Take a moment and visit both of us, concile GmbH and IDL Biotech AB, during the meeting to learn more about the first quantitative POC system for diagnosing and monitoring urinary bladder cancer (Booth A34 in Hall 9).

## COOK MEDICAL

O'Halloran Road, National Technology Park, 0000 Limerick, Ireland

F : +972-9-7423212  
W : www.elmedical-group.com  
E : Jacob@elmedical-group.com  
Booth nr. : B76

Elmedical treats non-muscle invasive bladder cancer (NMIBC) by its unique BWT - Bladder Wall Thermo-chemotherapy. BWT is a powerful combination of exact & uniform hyperthermia over the entire bladder lumen and mitomycin-C (MMC) instillation. Treatment efficacy, drug stability and patients' tolerance provided by low-pressure, high-flow circulation of a carefully heated MMC thru the bladder.

The CE approved technology is better controlled and tolerated, easier to perform and more cost effective than other device-assisted bladder instillations and has excellent outcomes. With 6 years median follow-up in a difficult group of highly recurrent NMIBC patients (median disease-free interval 5month) where 100% of patients failed BCG, 32% failed also MMC and 19% also microwave thermo-chemotherapy, BWT resulted in around a 6X extended disease-free interval compared to each patient baseline. Due to its extended disease-free interval, BWT is even more cost effective than stand-alone bladder instillations and is a clear solution for the BCG shortage. Today, more than 7000 BWT procedures performed successfully, practically with no adverse events. Elmedical is looking for international distributors. Europa Uomo, the European Prostate Cancer Coalition, represents and supports patient groups with prostate diseases in general and cancer in particular. Our aims include increasing awareness of prostate diseases, the support of individualized treatment based on optimal medical treatment with personalized patient care and patients' advocacy as a priority focused on quality of life based on solidarity and mutual respect. Our expansion is based on collaboration with the professional organizations to provide information on evidence based treatment, to educate men on holistic patient care and on solidarity in advocacy with other patient support groups.

## EUROPEAN BOARD OF UROLOGY

W : www.ebu.com  
Booth nr. : A42

The European Board of Urology (EBU) is a section of the European Union of Medical Specialists (UEMS). The EBU's objective is to promote the highest level of urological training in Europe, both on the basic and postgraduate level. The EBU is a non-profit organisation that is charged with regulatory matters. It has independent evaluation tools and authority, as well as broad expertise in urology training standards and requirements. The key to ensuring unbiased and high-quality assessment of all EAU and other European urology-related training activities is the fact that the European Board of Urology works as an entirely independent regulatory organisation.

## EUROPEAN TUBEROUS SCLEROSIS ASSOCIATION

In den Birken 30, 45711 Datteim, Germany  
T : +351 933836990  
W : www.e-tsc.eu  
E : micaelarozenberg@gmail.com  
Booth nr. : A25

The European Tuberos Sclerosis Complex Association (ETSC) was established in 2012 after demand from National TSC Associations to share knowledge and information concerning tuberous sclerosis complex, understand more about the development of clinical trials and empower patients and families across Europe and raise awareness.

ETSC boasts 19 member countries, each representative is a parent who as well as dealing daily with the devastating effects that this rare disease has, also contributes actively to initiatives related to raising awareness on TSC for their local organisations.

## EUROPEAN UROLOGY

Radarweg 29, 1043 NX Amsterdam, The Netherlands  
T : +31 20 4853346  
F : +31 20 4853260  
W : www.europeanurology.com  
E : c.zanden@elsevier.com  
Booth nr. : A01

European Urology, the official journal of the EAU, has been a respected urological forum for over 35 years, and is currently read by more than 20,000 urologists across the globe. With an impact factor of 12.480, the journal has become the leading scientific publication in the field of urology.

European Urology is constantly updating and innovating its electronic and published features and layout in order to provide the best clinical guidance, research and education for urologists across Europe and the world.

Come see European Urology for yourself - visit either the European Urology or EAU booth (A01) at the exhibition.

## EXACT IMAGING (FORMERLY IMAGISTX)

550 Alden Road Unit 210-a, Markham L3R6A8, Canada  
T : +1 416.274.8166  
W : www.exactimaging.com  
E : info@exactimaging.com  
Booth nr. : G02

Exact Imaging (formerly Imagistx) introduces the world's first ultra high-resolution ultrasound system for urological applications enabling a whole new level of resolution. Urologists can now visualize suspicious areas in the prostate and specifically target biopsies, in addition to performing standard TRUS protocols. Due to its unmatched resolution, this new ultrasound system clearly visualizes ducts and glands and the prostate's peripheral zone. This system has not yet received FDA or CE approval, and so is not yet available for commercial release.

Booth nr. : G30

Invivo, a leader in disease-oriented, multi-modality clinical solutions, is pleased to introduce the next generation of prostate care with the UroNav Fusion Biopsy System.

Advances in multiparametric magnetic resonance imaging of the prostate now enhance the ability to visualize and evaluate clinically significant prostate cancer. Invivo now brings this important diagnostic information to the urology suite in a simple and intuitive workflow. DynaCAD for Prostate provides the diagnostic MR information needed for the fusion biopsy by automatically transferring the relevant prostate images and lesion location data over your computer network for lesion identification and guidance during the TRUS biopsy procedure. UroNav automatically recognizes the required prostate information and loads the images and reference data at point of care. It's powerful, fast and simple. Welcome to a better way for YOU and YOUR patient. For more information, please visit [www.invivocorp.com](http://www.invivocorp.com) or 1-877-INVIVO1

## MEDISPEC LTD

203 Perry Pkwy, Suite # 6, 20877-2169 Gaithersburg, MD, United States of America  
T : +1 301 944 15 75  
F : +1 301 972 6098  
W : www.medispec.com  
E : marketing@medispec.com  
Booth nr. : A27

With over 20 years of experience and expertise in shockwave therapy solutions, Medispec continuously introduces competitive systems and technological breakthroughs to the market. The company specializes in shockwave-based systems for urology, cardiovascular and orthopedics applications.

ED1000 is a non-invasive painless treatment designed to treat the cause of ED as opposed to merely treating the symptoms. Using low-intensity acoustic shock waves, the EDSWT treatment triggers the body's natural repair mechanism and stimulates the creation of new micro vascular blood vessel networks that increase the blood supply to erectile tissue. ED1000 is now available also as desktop system, enabling physicians to extend treatment availability (small facilities, and at home treatments). Medispec's lithotripsy systems offer robust performance and competitive technology, backed by successful clinical results: EM1000 (electro-magnetic based system) and (E3000 and E2000, an Electro-Hydraulic based systems).

Booth nr. : I45

Medi-Tate is committed to improve the quality of life in the male population by commercializing office based solution for BPH.

The Temporary Implantable Nitinol Device, iTIND 555™, BPH reshaping system, is a novel, office based solution, resulting in long term relief from BPH symptoms. There is no cutting, heating or removal of any prostate tissue. The iTIND 555™ procedure is bloodless, painless and does not require a catheter to be placed post-operatively. The iTIND 555™ implant is deployed in 5 minutes, remains in the prostatic urethra for 5 days and is then removed in 5 minutes, leaving no foreign body behind and forms a new long lasting pathway in the prostatic urethra.

At Medtronic, we're committed to Innovating for Life by pushing the boundaries of medical technology and actually changing the way the world treats chronic disease. Driven by our deep understanding of the human body and our close partnerships with physicians, we're transforming technology to treat patients across the entire care continuum. Our innovations help physicians diagnose diseases early, treat patients with the least amount of disruption possible, and minimize symptoms throughout the patient's life. Today, we're improving the lives of millions of people worldwide each year across numerous conditions—including heart disease, diabetes, neurological disorders, spinal conditions, and vascular diseases. But it isn't enough. So we're innovating beyond products. We're breaking down barriers, challenging assumptions, and looking beyond the status quo—to continually find more ways to help people live better, longer.

Booth nr. : A50

Products:  
Solution for Obstructive Uropathy:  
Overtoom Balloon Catheter System<sup>®</sup>  
Ureteral stents  
Ureteric stents  
Device Description OBS:  
The Overtoom Balloon Catheter System<sup>®</sup> is a pyelum catheter intended for treating strictures of the ureter and, in particular, strictures of the ureteropelvic junction in a less invasive way. It comprises a catheter with a balloon and a non-return valve device, and a delivery device with a stylet and two ports.  
The balloon (18 French) keeps ureter strictures dilated while they heal, in a similar way to the use of an indwelling large-diameter bladder catheter for urethral strictures, while urine flows through the shaft.  
To see the results of the treatment of UPJ obstruction patients with the Overtoom balloon, go to our link: <https://lnkd.in/bDKd3i6>  
To see the possibility to treat ureteric strictures in Bricker bladder patients with the Overtoom balloon go to our link: <https://lnkd.in/bEpQuGZ>

F : +41 71 677 4505  
W : www.storzmedical.com  
E : info@storzmedical.com  
Booth nr. : E46

Established in 1987, STORZ MEDICAL AG is a Swiss member company of the KARL STORZ Group. Our products have proved their efficacy all over the world in the medical disciplines of urology, orthopaedics, sports medicine, rehabilitation, gastroenterology, cardiology and dermatology.

Today, the focus is on personalized stone management, making it possible to tailor each patient's treatment to their own particular situation.

With the development of the MODULITH®SLX-F2 »connect«, STORZ MEDICAL has introduced a device that perfectly combines the demands of a urological workstation with those of a lithotripter. For purely endourological workstations without a shock wave therapy unit, STORZ MEDICAL has an impressive solution in the form of the PRIMERA 360. With both devices, the large dynamic flat-panel detector allows overview imaging of the entire genitourinary tract in diagnostic quality. Shock waves can also be effectively used in urological pain therapy, such as CPPS and Peyronie's disease

Booth nr. : I43

The World Federation of Incontinent Patients (WFIP) is a global federation of national patient organizations for sufferers of incontinence and related pelvic floor disorders. The Federation is dedicated to promoting worldwide the interests of patients and patient associations. The Federation provides its individual member associations with comprehensive and up-to-date information and guidelines and educational resources. It seeks international co-operation and consensus via advocacy, public health education and contact with official and scientific bodies and other patient advocacy groups worldwide. WFIP is officially recognized by the EAU as an affiliate partner and is at the forefront of the latest developments in healthcare such as patient reported outcomes and European eHealth initiatives. WFIP sits on numerous EU and Brussels - based health-centred committees.

WFIP is a member of the European Patients Forum (EPF) and the International Alliance of Patient Organizations (IAPO) For further information please visit Booth Number I43 [www.wfip.org](http://www.wfip.org)

Booth nr. : I40

WyMedical is a UK leading manufacturer and distributor of Urology products such as catheters and meatal dilators. We develop quality products which make a difference to a patient quality of life.

WyMedical has over 20 years' clinical experience in the Urology sector to enable WyMedical to identify areas where products can be improved.

Our Meatal Dilator is now a market leader in the UK for meatal stenosis with its tapered tip and hydrophilic coating it has become the clinician's choice. Our tapered and soft tip catheters are now widely used for quality and comfort and where other standard catheters are difficult or uncomfortable to insert for patients. Come visit us on our stand for a demonstration and further information.

Booth nr. : A08

ZEPHYR Surgical Implants is a team motivated by the desire to provide healthy and effective solutions for urological disorders. In 2005, after much research and development, our team developed innovative surgical prosthesis.

We call it the Artificial Urinary Sphincter.

In 2007, we established ourselves as an International Company dedicated to developing and manufacturing the ZSI 375, our Artificial Urinary Sphincter.

In 2012 we further added to our range of surgical implants with the introduction of the ZSI 475, a 3 component Hydraulic Penile Implant.

Since then, our team has grown to distribute in all continents of the globe, in over 1000 cases, and is gaining a reputation as a reliable, healthy and effective developer of Urological Implants.
